**Weekly Health Report**

OFFICE OF MILITARY GOVERNMENT FOR GERMANY (US)  
INTERNAL AFFAIRS AND COMMUNICATIONS DIVISION  
PUBLIC HEALTH AND WELFARE BRANCH

## Occupied Germany:

In the following Appendices "A", "B", and "C" are summaries of communicable disease cases and deaths by Regierungsbezirk and Land, and case rates by Regierungsbezirk and Land for the week ended 22 March 1947.

### COMMUNICABLE DISEASES:

Following one week without any new cases of smallpox two cases were reported from Wiesbaden, Land Hesse. One case of typhus fever and one case of relapsing fever were reported from Land Wuerttemberg-Baden. Available information indicates that the typhus fever originated outside the U. S. Zone. All possible measures have been taken to prevent the spread of the disease. Scarlet fever, whooping cough, typhoid fever, and measles continue their downward trends.
